

Innovators In Flow Technology

Filling unit for fast and safe semi-automatic filling!

New!

The competitive alternative to conventional automatic filling machines and stations.

The strong combination for perfect filling.

FLUX filling systems offer you everything you need for safe, fast semi-automatic filling out of barrels: a FLUX filling unit together with a FLUX liquid meter and FLUX amplifier. Benefit from this competitive alternative to conventional automatic filling machines and stations – custom-made to your requirements.

FLUX filling units (FAE) for media up to 300 mPas without solids content. Available in PP, PVDF and Stainless steel – as individual as your applications.

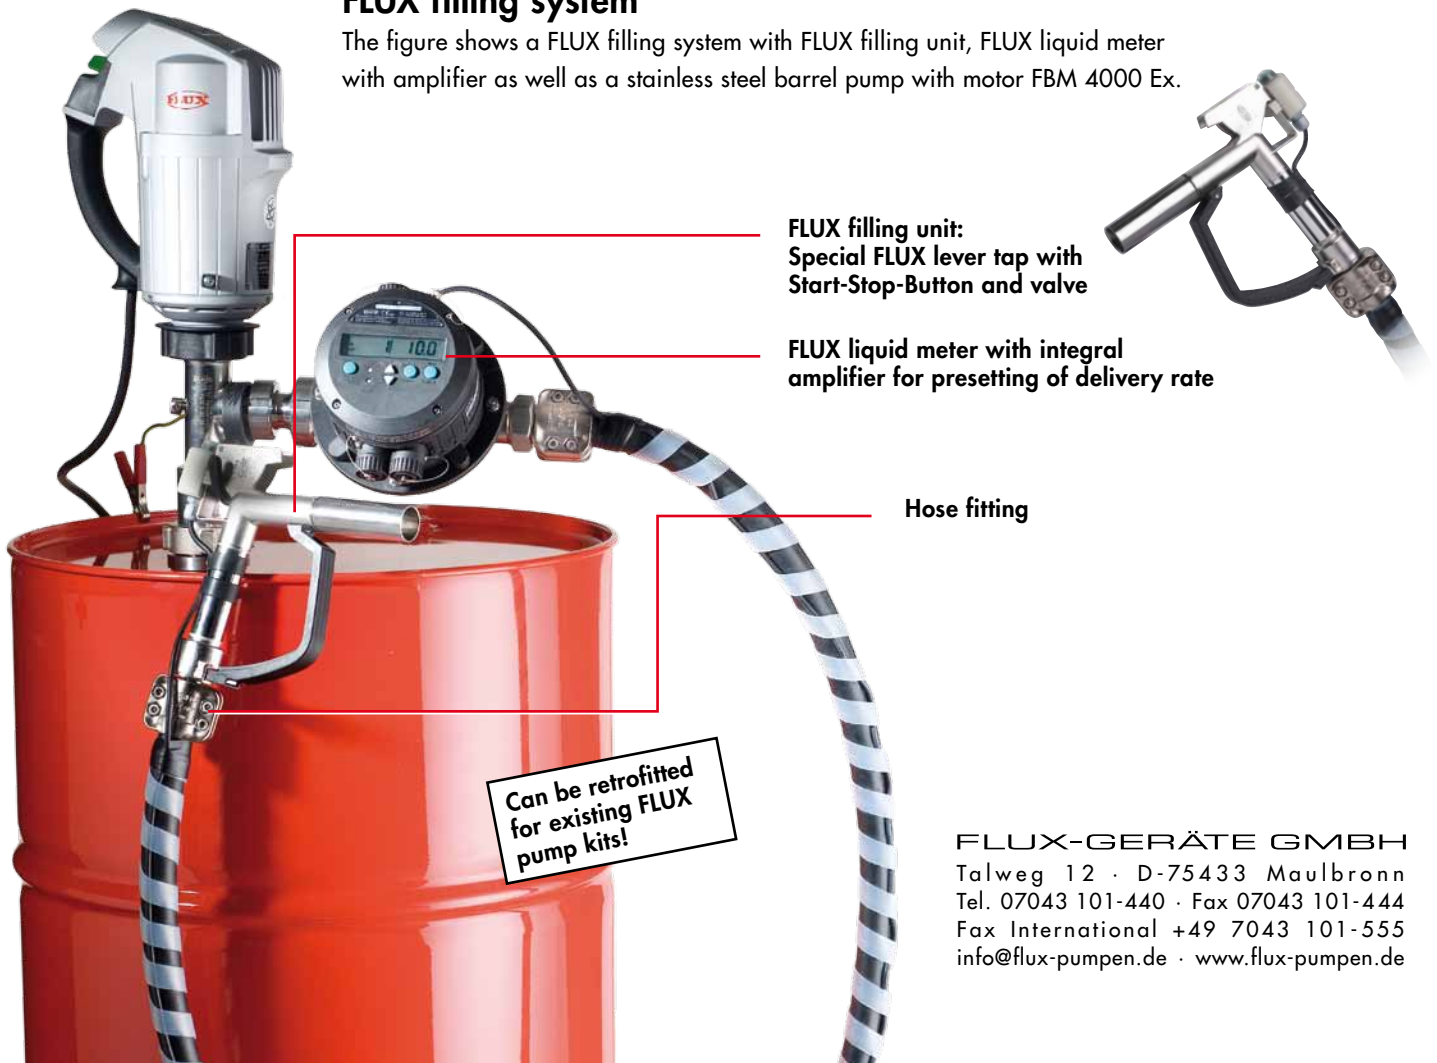

Type	Description	Order No.
FAE-PP DN 19		001 12 441
		001 12 432
		001 12 443
FAE-PVDF DN 19	Version with key button, without cable	001 12 442
		001 12 433
		001 12 448
FAE-S *		001 12 434

* Connection for stainless steel version: Bore 32 mm, suitable for hose fitting.

Further accessories like FLUX liquid meters, amplifier, hoses and cable on request.
