

FLUX CENTRIFUGAL IMMERSION PUMPS – QUALITY THAT SETS STANDARDS

Manufactured at our main plant, these ranges of immersion pumps are the result of extensive product and process evaluation by our research and development department.

They are a true FLUX product, from conception through to manufacture, assembly and testing. Their design philosophy, and the materials selected for their construction make them ideal for applications in the chemical industry, surface treatment, electroplating, printed circuit manufacturing, water treatment and wastewater treatment.

FLUX centrifugal immersion pumps can be used whenever liquids have to be transferred or circulated. They are suitable for use with a wide variety of acids and alkalis as well as other chemicals, typically coolants, lubricants and non-flammable solvents.

With delivery rates of up to 74 m³/h and delivery heads of maximum 35 m water column, FLUX centrifugal immersion pumps combine maximum efficiency with a robust and reliable construction, resulting in a pump that provides the ultimate in process security. These are features that you can rely on, each hour, 24 hours a day.

The mechanical seal types F 620 and F 640 are designed for typical liquid transfer operations, with either stationary or portable variants. These units compliment the well-proven barrel pumps range and have a higher output and kW-rating.

Top of the range, are the sealless units, these pumps complete the range of high output, high reliability immersion pumps. Designed for continuous use with a wide range of aggressive liquids, from acids to alkalis, the range includes the type F 706 – with only a sleeve bearing in contact with the liquid – or the types F 716 and F 726 - with a suspended free-flying shaft and no bearings or seals in contact with the liquid.

Three-phase drive motors are available as matched power units in kW-ratings from 0,37 to 5,5 kW, protected to IP 55 as well as explosion-proof to EEx e II T3 for models F 620, F 640, F 706 and F 726.

With immersion lengths from 300 to 4000 mm almost every application requirement can be met. The use of high-class materials such as Hastelloy C and polyvinylidenfluoride, together with polypropylene and stainless steel, are combined with design experience perfected over decades of pump manufacturing. This guarantees the long service life of FLUX centrifugal immersion pumps.

Detailed information and performance charts are shown on the following pages.

To receive a quotation compiled to your application, please could you to fill in the questionnaire on page 22.2 and return it to us.

SAFE, POWERFUL, RELIABLE – THE NEW FLUX RANGE

With 4 different design formats within the vertical centrifugal immersion pump range FLUX offer a cost effective, reliable solution for many liquid transfer and circulating operations. With these pumps FLUX meet the requirements of the market with their forward-looking designs and the manufacture of high quality products.

Type F 706:
4 different sizes, sealless design with sleeve bearing, immersion length up to 2000 mm

Type F 726:
very robust construction with shaft bearing located in a pedestal, version with support bars for continuous use, suitable for dry operation

Type F 620 and F 640:
with mechanical seal in vertical and horizontal version

Type F 716:
compact design requires little space for installation, version with support tube or support bars for continuous use, suitable for dry operation

FLUX CENTRIFUGAL IMMERSION PUMP F 620 S IN STAINLESS STEEL SIZE 15 AND 30

Typical Applications

Transferring low flammability liquids up to a viscosity of 2500 mPas (cP) from containers or tanks, either open topped or closed. Suitable for stationary or portable applications.

Construction features

Centrifugal pump in stainless steel consisting of an inner tube and outer tube.

The centrifugal impeller in the pump housing is driven by the motor via the drive shaft. The drive shaft is supported by intermediate bearings within the inner tube, a mechanical seal separates the liquid from the bearings and upper shaft. This construction provides the ultimate in stability, and ensures the maximum integrity of the mechanical seal. With an open conical impeller.

Three-phase motors in differing kW-ratings are available as a matched power unit. Connection to the pump is made via a flexible coupling.

SCOPE OF SUPPLY

A complete vertical centrifugal immersion pump consists of: drive motor, pump and necessary accessories.

Weight per pump: 15 – 45 kg depending on the pump size, immersion length and motor kW.

CENTRIFUGAL IMMERSION PUMPS F 620 S

FLUX CENTRIFUGAL IMMERSION PUMP F 640 PP IN POLYPROPYLENE SIZE 15, 30, 15 Z AND 30 Z

Typical applications

Transferring low flammability liquids up to a viscosity of 2500 mPas (cP) from containers, tanks, either open topped or closed.

Transferring corrosive liquids in chemical processing and engineering, metal-working and electroplating together with water treatment and waste water treatment. Suitable for stationary or portable application.

Construction features

Vertical centrifugal immersion pump in polypropylene consisting of an inner tube and outer tube.

The centrifugal impeller in the pump housing is driven by the motor via the drive shaft. The drive shaft is supported by intermediate bearings within the plastic sleeved steel inner tube, a mechanical seal separating the liquid from the bearings and upper shaft. This construction provides the ultimate in stability, preventing elongation of the plastic at high temperatures and ensures the maximum integrity of the mechanical seal.

With an open conical impeller or a closed centrifugal impeller (Z).

The liquid is delivered between the inner and outer tubes to the pump outlet.

Three-phase motors in differing kW-ratings are available as a matched power unit.

Connection to the pump is made via a flexible coupling.

SCOPE OF SUPPLY

A complete vertical centrifugal immersion pump consists of: drive motor, pump and necessary accessories.

Weight per pump: 15 - 60 kg depending on the pump size, immersion length and motor kW.

CENTRIFUGAL IMMERSION PUMP F 640 PP

FLUX CENTRIFUGAL IMMERSION PUMP F 640 PP AND F 640 PVDF IN POLYPROPYLENE OR POLYVINYLIDENFLUORIDE SIZE 185

Typical applications

Transferring low flammability liquids up to a viscosity of 2500 mPas (cP) from containers, tanks, either open topped or closed.

Transferring corrosive liquids in chemical processing and engineering, metal-working and electroplating together with water treatment and waste water treatment. Suitable for stationary or portable application.

Construction features

Vertical centrifugal immersion pump for stationary application.

The centrifugal impeller in the pump housing is driven by the motor via the drive shaft. The drive shaft is supported by intermediate bearings within the plastic sleeved steel inner tube, a mechanical seal separating the liquid from the bearings and upper shaft. This construction provides the ultimate in stability, preventing elongation of the plastic at high temperatures and ensures the maximum integrity of the mechanical seal.

This pump design does not have a separate discharge tube. Immediately after the pump housing the liquid is fed back into the outer tube and delivered to the outlet connection between the inner and outer tubes.

A range of carefully chosen impeller diameters, together with a range of three-phase motors in differing kW-ratings, ensures the optimum selection of pumps to meet the specific operating requirements.

Connection of pump and motor is made via a flexible coupling.

CENTRIFUGAL IMMERSION PUMP F 640 PP AND F 640 PVDF

FLUX CENTRIFUGAL PUMPS F 620 S TR AND F 640 PP TR IN HORIZONTAL VERSION

Typical applications

Transferring low flammability liquids up to a viscosity of 2500 mPas (cP) from containers or tanks, either open topped or closed.

The pump is used either horizontally mounted onto a base plate or fixed vertically.

Construction features

Centrifugal pump in horizontal version in stainless steel or polypropylene, consisting of an inner tube and outer tube.

The centrifugal impeller in the pump housing is driven by the motor via the drive shaft

The drive shaft is supported by intermediate bearings within inner tube, a mechanical seal separates the liquid from the bearings and upper shaft.

The PP version has a steel cored PP inner tube. This construction provides the ultimate in stability, preventing elongation of the plastic at high temperatures and ensures the maximum integrity of the mechanical seal.

With an open conical impeller or a closed centrifugal impeller (Z)

Depending on the model, suction and discharge sides are fitted with threaded or flanged connections.

Three-phase motors in differing kW-ratings are available as a matched power unit. Connection to the pump is made via a flexible coupling.

Drive motors see page 9

SCOPE OF SUPPLY

A complete centrifugal pump in horizontal version consists of drive motor, pump and base plate. Weight per pump including base plate: 9 – 50 kg depending on pump size and motor kW.

CENTRIFUGAL PUMPS IN HORIZONTAL VERSION

FLUX CENTRIFUGAL IMMERSION PUMP F 706 PP IN POLYPROPYLENE SIZE 135, 185, 230 AND 350

Typical applications

Transfer of corrosive liquids in the chemical industry and all aspects of chemical engineering together with any application that requires the safe and economical transfer, or circulation, of acids and alkalis or other chemical fluids, with or without solids in suspension.

Construction features

Vertical centrifugal immersion pump for stationary application. The robust pump housing is solidly welded to the support tube. A sleeve bearing, which is lubricated by the liquid, allows immersion lengths of up to 1000 mm, and on the pump size 230, with additional intermediate bearings, even up to 2000 mm. A large polypropylene-coated drive shaft together with the use of a thick-walled support tube ensures a very smooth running pump. This type of construction prevents the rotating components from coming to contact with the pump housing and guarantees a long service life and extended maintenance intervals, even in the case of continuous use.

A range of carefully chosen impeller diameters, together with a range of three-phase motors in differing kW-ratings, ensures the optimum selection of pumps to meet the specific operating requirements. Connection of pump and motor is made via a flexible coupling.

Three-phase motors explosion-proof to EEx e II T3 with terminal box on request.

SCOPE OF SUPPLY

A complete vertical centrifugal immersion pump consists of: drive motor, pump with mounting flange and necessary accessories. Weight per pump F 706 PP: 13 – 85 kg depending on the pump size, immersion length and motor kW.

CENTRIFUGAL IMMERSION PUMP F 706 PP

FLUX CENTRIFUGAL IMMERSION PUMP F 716 PP AND F 716 PVDF IN POLYPROPYLENE OR POLYVINYLIDENFLUORIDE SIZE 115 AND 135

Typical applications

Transferring and circulating of neutral or corrosive liquids in the chemical industry and chemical engineering, electroplating industry, steel or stainless steel pickling plants, flue gas decontamination, exhaust air purification, water and waste water treatment.

Construction features

Vertical centrifugal immersion pump for stationary application. With a compact design requiring very little head room above the mounting flange. This design uses a three-phase motor with extended shaft, especially allowing the pump to use the motor shaft. All wetted parts are made in PP or PVDF. The robust support tube (bars) solidly connected to the mounting flange ensures a very smooth running, prevents the rotating elements from making contact with the pump housing and guarantees a very long service life, even in case of continuous use.

As neither bearings nor seals are in contact with the liquid, the pump is very wear-resistant and suitable for dry running operation.

The immersion length of the pump can be extended, up to 1000 mm maximum, by the suction tube option. A suction strainer welded onto the cover of the pump housing or onto the extension tube protects the pump against the ingress of coarse impurities.

A range of carefully chosen impeller diameters, together with a range of three-phase motors in differing kW-ratings, ensures the optimum selection of pumps to meet the specific operating requirements.

CENTRIFUGAL IMMERSION PUMP F 716 PP AND F 716 PVDF

FLUX CENTRIFUGAL IMMERSION PUMP F 726 PP AND F 726 PVDF IN POLYPROPYLENE OR POLYVINYLIDENFLUORIDE SIZE 115 AND 135

Typical applications

Transferring and circulating of neutral or corrosive liquids in the whole field of the chemical industry and chemical engineering, electroplating industry, steel or stainless steel pickling plants, flue gas decontamination, exhaust air purification, water and waste-water treatment.

Construction features

Vertical centrifugal immersion pump for stationary application.

The robust pump shaft is mounted in an upper pedestal and supported by two antifriction bearings. This construction, with the bearings spaced along the pedestal, ensures that any radial or axial forces are absorbed, even under heavy load. The result is a very smooth running pump.

The solid version with support bars prevents the rotating elements from making contact with the pump housing and guarantees a very long service life, even in continuous use applications. As neither bearing nor seals are in contact with the liquid, the pump is very wear-resistant and suitable for dry running operation. The immersion length of the pump can be extended, up to 1000 mm maximum, by the suction tube option. A suction strainer welded onto the cover of the pump housing or onto the extension tube protects the pump against the ingress of coarse impurities.

A range of carefully chosen impeller diameters, together with a range of three-phase motors in differing kW-ratings, ensures the optimum selection of pumps to meet the specific operating requirements.

	500 mm	726 42 005	726 42 105	726 62 105

Accessories:

Extension tube in PP or PVDF in steps of 100 mm. Dimension p up to. max. 1000 mm.

Suction strainer in PP or PVDF welded onto the cover of the pump housing or onto the extension tube.

DRIVE MOTORS FOR CENTRIFUGAL IMMERSION PUMPS F 726 PP AND F 726 PVDF

Three-phase motors protected to IP 55, with cable terminable box

Capacity P 2	Flange Ø	Voltage	Frequency	Nominal speed	Part No.
0,37 kW	120 mm	230/400 V	50 Hz	2850 rpm	001 00 004
0,55 kW	120 mm	230/400 V	50 Hz	2850 rpm	001 00 005
0,75 kW	120 mm	230/400 V	50 Hz	2850 rpm	001 00 019

Drive motors explosion-proof to EEx e II T3 with cable terminal box on request.

SCOPE OF SUPPLY

A complete vertical centrifugal immersion pump consists of: drive motor, pump with mounting flange and the necessary accessories.

Weight per pump 17 – 30 kg depending on the pump size, immersion length and motor kW.

CENTRIFUGAL IMMERSION PUMP F 726 PP AND F 726 PVDF

FLUX CENTRIFUGAL IMMERSION PUMPS F 726 PP AND F 726 PVDF IN POLYPROPYLENE OR POLYVINYLIDENFLUORIDE SIZE 185 AND 230

Typical applications

Transferring and circulating of neutral or corrosive liquids in the whole field of the chemical industry and chemical engineering, electroplating industry, steel or stainless steel pickling plants, flue gas decontamination, exhaust air purification, water and waste-water treatment.

Construction features

Vertical centrifugal immersion pump for stationary application.

The robust pump shaft is mounted in an upper pedestal and supported by two antifriction bearings. This construction, with the bearings spaced along the pedestal, ensures that any radial or axial forces are absorbed, even under heavy load. The result is a very smooth running pump. The solid version with support bars prevents the rotating elements from making contact with the pump housing and guarantees a very long service life, even in continuous use applications. As neither bearing nor seals are in contact with the liquid, the pump is very wear-resistant and suitable for dry running operation.

The immersion length of the pump can be extended, up to 1500 mm maximum, by the suction tube option. A suction strainer welded onto the cover of the pump housing or onto the extension tube protects the pump against the ingress of coarse impurities.

A range of carefully chosen impeller diameters, together with a range of three-phase motors in differing kW-ratings, ensures the optimum selection of pumps to meet the specific operating requirements.

F 726 PP2-185

F 726 PVDF2-230

CONSTRUCTION FEATURES IN DETAIL

2 antifriction bearings located in a pedestal

seal kit prevents vapours entering the pedestal

robust pump shaft with protective coating

version with support bars for temperatures of up to 80 °C (PP) or 100 °C (PVDF)

centrifugal impeller in differing diameters

TECHNICAL DATA

Performance chart F 726 PP2-185 and F 726 PVDF2-185

Measured values $\pm 10\%$ determined with water (20 °C). Nominal speed $n = 2850$ rpm

In order to achieve the desired output, centrifugal impellers in differing diameters are available.

In determining the absorbed kW of the motor, multiply the absorbed kW shown in the above diagram with the specific gravity of the liquid to be pumped.

QUESTIONNAIRE TO QUOTE ON

FLUX VERTICAL CENTRIFUGAL IMMERSION PUMPS

REQUESTED VERSION

for portable application for stationary application for horizontal application

LIQUID DATA

Description _____ Chemical Formula _____
 Concentration _____ % Specific gravity _____ g/cm³
 Viscosity _____ mPas/cP at _____ °C Operating temperature _____ °C
 Solids in suspension _____ g/l hard soft Size of solids _____ mm
 Does liquid crystallize? Yes No at _____ °C
 Which materials are resistant to liquid according to previous experience?

OPERATING DATA

Delivery rate _____ m³/h Delivery head _____ m water column
 Immersion length _____ mm Suction strainer Yes No
 Mounting flange in special dimensions: Extension tube Yes No
 outside Ø _____ mm, p. c. Ø _____ mm Dimension p = _____ mm
 pressure flange Oui Non
 outside Ø _____ mm, p. c. Ø _____ mm Ø of the container opening _____ mm
 Operating time per day _____ Number of starts _____

DRIVE MOTOR

Three-phase motor Operating voltage _____ Volt _____ Hz
 Is motor to be explosion-proof? Yes No

THE GREAT RANGE OF FLUX PUMPS

YES!

I am interested in top class pump technology.
Please send the following catalogues:

- FLUX LABORATORY PUMPS
- FLUX BARREL PUMPS
- FLUX CONTAINER PUMP
- FLUX HIGH VISCOSITY LIQUID PUMPS
- FLUX AIR-OPERATED DIAPHRAGM PUMPS
- FLUX LIQUID METERS
- FLUX PROCESS CONTROL SYSTEM PCS

INNOVATORS IN FLOW TECHNOLOGY

WORLD OF PUMPS – PUMPS FOR THE WORLD

All around the globe, FLUX is synonymous with top standards in pump technology. Whether it is barrel pumps, high viscosity liquid pumps, vertical centrifugal immersion pumps, air-operated diaphragm pumps, liquid meters, mixers or top class accessories – FLUX with its complete and comprehensive range is always the one to address to. Benefit from our competence. We look forward to hearing from you!
