Griswold Pump Company manufactures a complete line of ANSI pumps for the chemical process market. We have since the 1970's. Our parts are used everyday to build complete pumps that perform in critical applications around the world. Our quality assurance programs insure that all parts are manufactured to the highest standards and within their engineered tolerances. Tolerances that assure each and every part in the entire pump maintain a precise fit to insure pump performance and long life.

**Best of all, our *pumps and parts are directly interchangeable with 3196 pumps...*and the *cost savings...* Dare to compare !**

**Same Day Shipment On Parts !**  
36 Hour Shipment on Pumps
