Jabco Spare Parts Identification Guide

The spare part tables pages 15-22 specify the Jabco part numbers for each Jabco pump shown on pages 1-14.

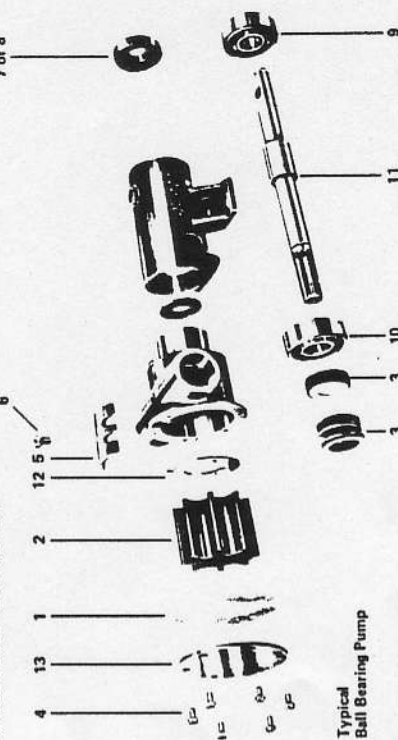

The illustrations below are meant only for pictorial identification and do not fully represent complete Jabco Pumps. Key numbers are to be found on Parts List Headings.

TYPICAL JABCO PLAIN BEARING PUMP

Typical
Plain Bearing Pump

TYPICAL JABCO BALL BEARING PUMP

Typical
Ball Bearing Pump

Insist on genuine Jabco parts, made only by the original and world's leading manufacturer of self-priming flexible neoprene impeller pumps

Notes

Various seal changes have been introduced and new and old numbers are as follows:

Old Part No.	New Part No.
SP2700-06	SP2701-21
6408	21849
SP6080-07	22817-0010*
SP6080-06	22845-0000
SP6080-0373	22817-0000
SP6080-0374	21849

Some impeller numbers have been changed as follows:

Old Part No.	New Part No.
AL-24	4528 0001
AL-24-37	4528 0003
B12	4527 0001
B12-37	4527 0003
C12	4568 0001
C12-37	4568 0003
D12	4588 0001
D12-37	4588 0003

* Note: This seal assembly contains a retaining ring which may be required for certain pumps for seal abutment

A complete change of the dash numbering system has been made and follows a regular pattern. I.e. a neoprene impeller is always -0001 a nitrile impeller is always -0003
